

```

// allocator.cpp : Defines the entry point for the console application.
//      my_allocator, my_deallocator zmieniaja wartosc wskaznikow
//      Dla tego przekazujemy funkcjom wskazniki do wskaznikow
//      W przypadku przekazywania wskaznikow w steoku powstawala by kopia tych
//      wskaznikow, a przy wyjściu z funkcji ta kopia byla by niszczone -
//      program main nie dostal by wartosci tych wskaznikow
